Akber Ali

Windows Phone 7 Development

EP.NET Professionals User Group

<http://www.epdotnet.com>

Welcome

- **Welcome to our event on Windows Phone 7 Development**
- hours of Windows Phone Content
 - Introduction to the device
 - Silverlight, Expression and XNA development
 - Using marketplace to sell your solutions
- Lots of demo, sample code to enjoy
- And last but not last not lease big prizes

What you are not getting

- This is not a programming course
- We assume you know how to write and run C# programs
- We assume you can use Visual Studio
- Some Silverlight and/or XNA familiarity will be useful

What you need development

- A Windows PC
 - Supporting at least DirectX 10.1 for XNA
- A copy of the Windows Phone SDK (Visual Studio 2010 Express Edition, Expression Blend, Silverlight 4 SDK)
- No need for an actual phone – just yet...

How to Win Big

- At the end of a section we will have a True-False quiz where you can “shout out” the answer
- We will randomly pick correct answer and award prizes which could be anything from a executive jet to Microsoft T-Shirt.
- Let’s try that now...

Sample Review

Akber is taller than Shahid

XNA and Silverlight Rock

Great programmer likes cheese

- Select the answer you think works by changing your seat color to red or green
- Red means false, green means true
