Windows Phone

Phone Overview

Windows Phone 7 Design

Consumer will love Windows Phone 7

Story of Metro

Designing great Windows Phone application

App Design Studio ... a start up

A different kind of phone

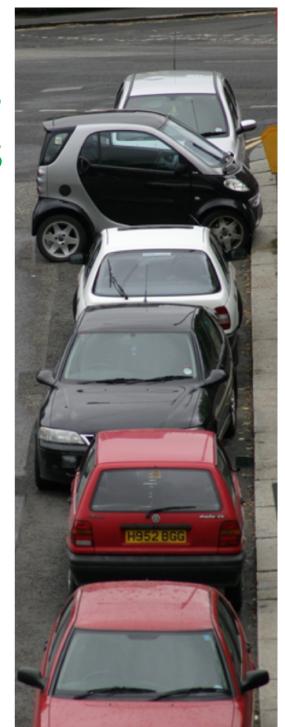

Different, For Good Reasons

- Smart Design
- Integrated Experiences

Hub design integrates great Microsoft Experience

People

Pictures

Games

Music + Video

Office

Marketplace

Who we design for: Anna + Miles

Anna

Part time PR professional and busy mom

"My life is a balancing act between work, family, friends, and my own personal needs."

Miles

Growing his own architectural biz

"I love running my life real-time so I can take advantage of whatever is inspiring me...whether it's a new project, a pick up game or a stolen moment with Anna."

Metro

78	ARSCHAU	20
0 .	RERLIN	720
		720
30	STUTTGAN	1720
356	PEKING STUTTGART HBF.	1 J 2 5
720	STUTION	1725
796	RASEL	173
814	SAN FRANCISCO SAN FRANCISCO SHANGHAI PUDONG	173
927	CHANGUL	17
728	CAL / BUILD - TICURITU	17
266	SALZBURG NOVGOROD PERM-N. NOVGOROD	1
3208	INCKAU - INTE	1
2188	MO-LINU-LINU.	

METRO IS OUR DESIGN LANGUAGE. WE CALL IT METRO BECAUSE IT'S MODERN AND CLEAN, IT'S FAST AND IN MOTION. IT'S ABOUT CONTENT AND TYPOGRAPHY, AND IT'S ENTIRELY AUTHENTIC.

Principles

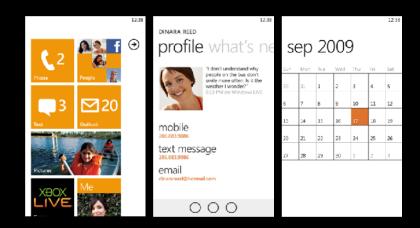

Clean, Light, Open, Fast

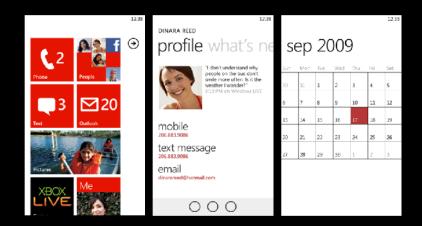

Celebrate Typography

Alive in Motion

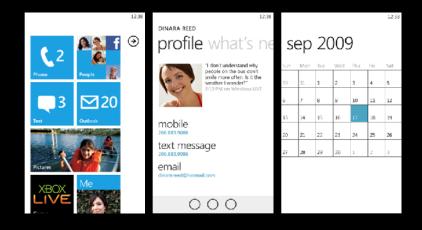

Content, Not Chrome

Authentically Digital

Metro User Experience

Focuses on the individual and their tasks

Helps organize information and applications

Metro Works for you

Personal

Weather surfaced on the live tile in Start

Relevant

Weather updated based on your location

Connected

Weather for your contacts

Hardware Implications

Hardware buttons

Optional landscape keyboards

Design for one hand usage whenever possible

tap

Gestures

Actions on an item in a two step process
Stop a list from scrolling

double tap

Toggles between "in" and "out" zoom states of a control or application

touch & hold

Shows options (context menu) for an item

pan

Moves content via direct manipulation (content sticks to the fingter and follows)

flick

Moves content

pinch & stretch

Continuous zoom

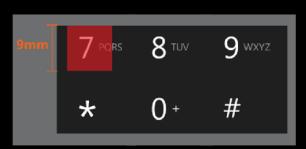

Touch

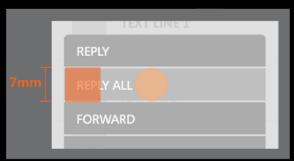

Recommended touch target size is 9mm

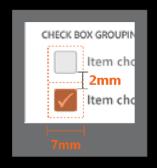

Minimum touch target size is 7mm

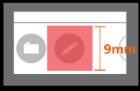

Minimum spacing between elements is 2mm

Visual size is 60-100% of the touch target size

Common controls

ok

sample text for edit

AUG 20 2009

Edit box group label

Set sample value 25%

Toggle buttons with label

Justified Justified Left

12:38

Rest state
On

system link

PM

AM

2:11

Radio button label

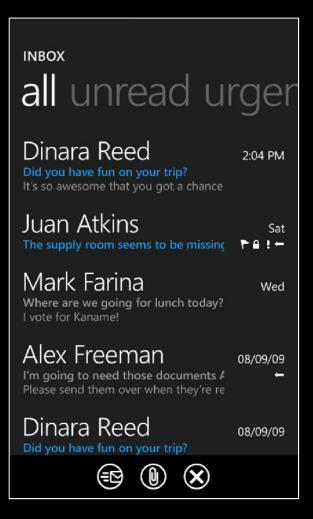

Application Bar + Menu

Up to 4 icons

Don't fill all 4 slots if not needed

Swipe up the bar to bring up the menu

Tabs

Separate multiple tasks

Tap or flick tabs to change them

APPOINTMENT

details attendee

Meeting request "demo

Thursday 09/17/09, 11:00 AM – 12:00 PM 221st Bakersfield

Meeting Organizer: Eva Valverde Calendar: Exchange server

Reminder: 15 min before

Please bring all supporting files required and the backups ..

Required: Eva Valverde; Erin Arakana Optional: Doug Adams; Wyatt Akanoshi; Alexa Chung

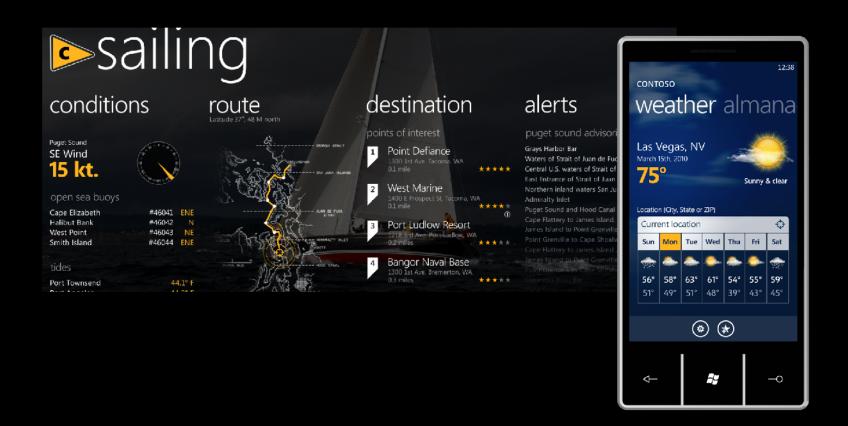

Hubs vs. Single-Page Apps

Iconography

Icons in the application menushould be consistent

Test icons with users (pay attention to context)

Metro Map

Services Powering Experiences

Other Devices

people standards + server code + client code -> experiences

Web API

Windows Phone

Platform Overview

Platform Goals

Help end users personalize their phones

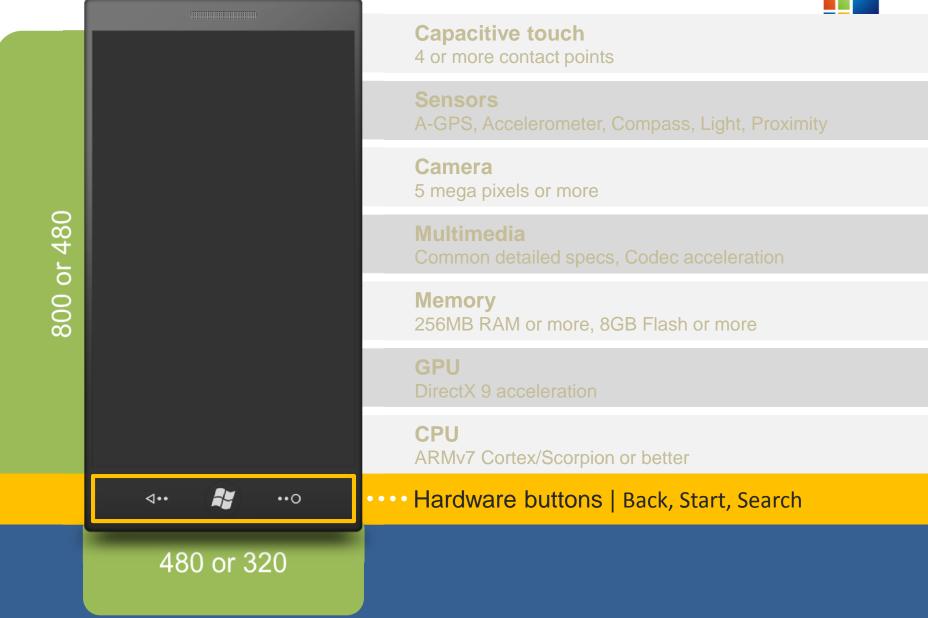

Help developers be profitable

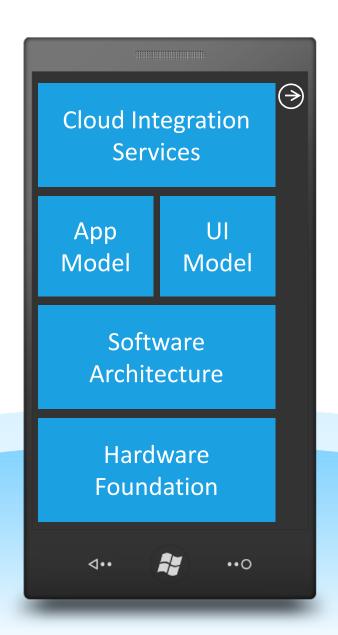

Enable cloud powered experiences

Hardware Foundation

Common Capabilities

Input

- Touch
- Hardware buttons

Media

- Digital media capture & playback
- Media library access

Data

- Isolated Storage
- LINQ (Objects and XML)

.NET

- Superset of Silverlight 3.0
- Windows Communication Foundation
 - SOAP and REST services.

Phone Access

- Integrated access to phone UI
- Sensors
- Picker for contacts and photos

Integrated With Cloud Services

- App Deployment & Updates
- Notifications
- Location
- Xbox LIVE

Software Architecture

Applications	Your App UI and logic						
	Frameworks

Hardware Foundation							

Windows Phone

Developer Options

Two Flavors of Applications

- Modern XAML/event-driven application UI framework
- Rapid creation of visually stunning apps
- Metro-themed UI controls
- HTML/JavaScript
- 500,000 developers spanning Windows and web

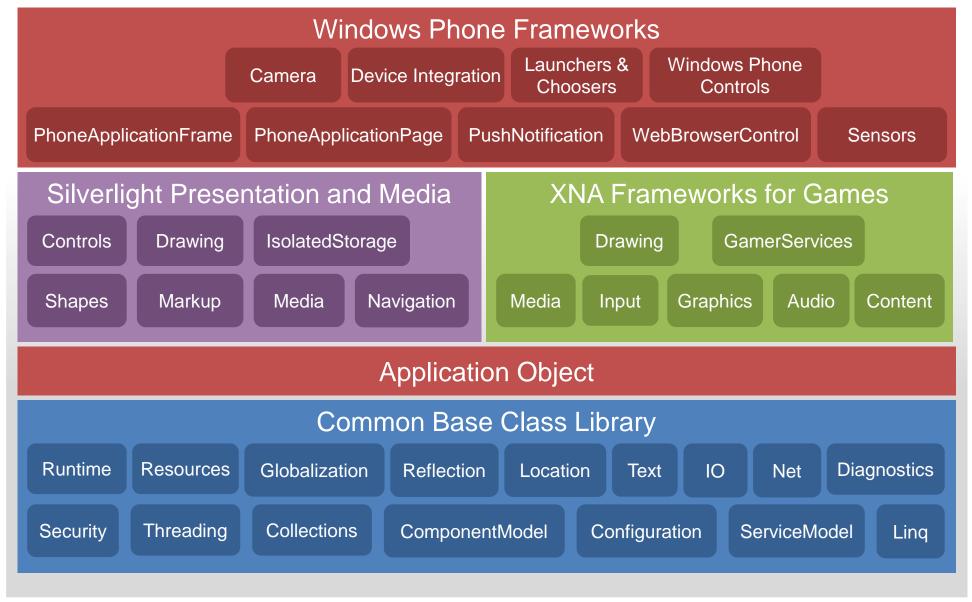

- High performance game framework
- Rapid creation of multi-screen 2D and 3D games
- Rich content pipeline
- Mature, robust, widely adopted technology

spanning Xbox 360, Windows, and Zune

Who can Develop Applications for Windows Phone?

- Silverlight Developers
 - Windows Phone 7 Applications can be Silverlight based
- Game Developers
 - Windows Phone 7 Applications can be XNA based
- WM Developers
 - The life of managed application developers become easier
 - No P/Invoke, number of form factors
 - If you can write C#, you can develop for Windows Phone

But remember....

- You are developing for small device
 - Decision you make about your application can have an impact on user experience and phone battery life
- The power that you get is amazing for such a small mobile phone
 - But it is not the same as desktop or laptop
- We will mention these issues as we talk about the development process

Application Features

- Local storage for data
- Consume Web Services as easily as on the desktop
- Silverlight
 - Expression based design
 - XAML Presentation Layer, C# code-behind
 - Data binding

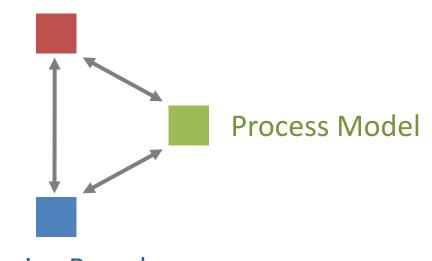

Goal: Great User Experiences

Predictable
Safe
High performance
Innovative

.NET Common Language Runtime

Service Based Application Deployment

Windows Phone

Developer and Marketplace

What's a XAP?

Tools

Common format for all Windows Phone apps & games

Declarative, manifest-based installation

Integrated into security model of phone

Deployment Process

Application Marketplace

Enhanced Discovery

- Easy to find great applications, games
- Fun to browse the marketplace

Simple, Reliable Acquisition

- Try before you buy
- Buying and downloading content is a breeze
- Payment flexibility (MO billing and credit card)
- Easy application updates

Call to Action

- Single Download file
- Download the tools!
- Read and understand the design guidelines
- Give us feedback

Windows Phone devices are based on a common platform

Windows Phone development uses managed code

Application are developed using Visual Studio 2010

The Windows Phone emulator runs on actual phone hardware

It is not possible to access cloud data services from phone
